# PATIO SIDE CHAIR ASSEMBLY INSTRUCTIONS

ALL SLATS ARE IDENTICAL AND HAVE SCREW LOCATIONS MARKED WITH DIMPLES.

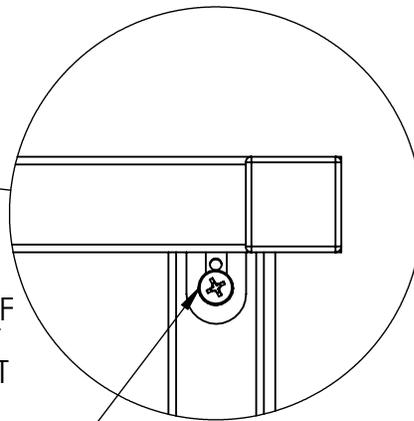

THE FRONT SEAT SLAT NEEDS TO HAVE THE PAIR OF HOLES TOWARDS THE FRONT. (SEE DETAIL A). THIS IS TO GIVE MORE CLEARANCE FOR DRIVING THE SCREWS. THE DIRECTION OF ALL OTHER SLATS DOES NOT MATTER.

WHEN STARTING THE SCREWS WHICH GO THROUGH SQUARE TUBING, THE INSTALLATION TOOL CAN BE USED. PUT THE SMALL END IN THE HOLE TO GUIDE THE SCREWS AND PREVENT THEM FROM GETTING LOOSE IN THE TUBING. (SEE DETAIL B). IT MAY BE EASIEST TO START EACH SCREW WITH A HAND-HELD SCREWDRIVER AND FINISH WITH A CORDLESS SCREWDRIVER.
